@java_doctor (Java/Python Tutorials)

Motivated 4th-year Computer Science student and career shifter seeking an internship opportunity to apply and enhance my skills in software development, data science, and mobile/web technologies. Eager to contribute practical problem-solving skills and a strong technical foundation in a dynamic team environment.

Key Highlights

- Strong foundation in software engineering and data science with practical experience in Java, Python, and MySQL.
- Proven ability to develop full-stack web and mobile applications with user-focused design.
- Excellent problem-solving skills and quick adaptability from a technical background in electronics and IT.
- Demonstrated leadership as Class Representative and later as a Subleader in a professional company setting.

TECHNICAL PROFILE

Languages: Python, C#, JavaScript, Java
Databases: MySQL, Firebase
Data Science & Big Data Analytics: Pandas, Numpy, Matplotlib, Jupyter
CI/CD: Git, Github
Web Development: HTML, CSS, Firebase, APIs
Mobile Development: Android Studio, XML
Hosting Platforms: Render (onrender.com), GitHub Pages

WORK EXPERIENCE

ASSEMBLY TECHNICIAN Jan 2019 – May 2022
JAE Philippines 3 yrs 5 mos
General Trias, Cavite

- Assembled mechanical/electrical components based on specs.
- Conducted quality control inspections and maintained assembly equipment.
- Authored technical reports (TMI instructions) and followed strict safety protocols.

LINE TECHNICIAN Sep 2017 – May 2018
Harada Industries 10 mos
Dasmarinas, Cavite

- Conducted equipment calibration and troubleshooting to ensure smooth production.

- Worked closely with teams to reduce downtime and meet operational targets.
- Authored technical reports and followed strict safety protocols.

MACHINE TECHNICIAN Jul 2015 – Jun 2016
HOYA Electronics 1 yr
General Trias, Cavite

- Maintained and repaired industrial machinery.
- Performed inspections, diagnosed faults, and contributed to production efficiency.
- Built foundation in tech operations, later transitioning to software engineering.

EDUCATION

STI COLLEGE DASMARINAS Cavite, PH
Bachelor of Science in Computer Science Expected Jun 2026
Cumulative GWA: **1.21** (on a 1.0-5.0 scale)
Programming Coursework: Software Engineering; Operating Systems; Data Structures and Algorithms; Computer Architecture and Organization

TRAININGS AND CERTIFICATIONS

JAVA FUNDAMENTALS COURSE COMPLETE June 2023
Oracle Academy

- Completed foundational coursework in Java programming including object-oriented principles, control structures, and data types.
- Gained hands-on experience in developing Java applications under guided instruction.
- Awarded Certificate of Completion for satisfactory performance in all course requirements.

CODEFEST – STI College

• Local 2nd Runner-Up	2023
• Local Champion	2024
• Cluster Level Participant	2024
• Local Champion	2025
• Cluster Level 2nd Runner-Up	2025

13TH IT SKILLS OLYMPICS – UNIVERSITY OF MAKATI November 2024

- Certificate of Participation in Android Development (Productivity)
- Event Theme: "Augmenting Security Towards the Techno-Utopia"

- Participated under STI College Dasmariñas

TOPCIT LEVEL 2

- Successfully participated and qualified for the Test of Practical Competency in IT (TOPCIT) – Level 2

MAJOR PROJECTS

All my personal projects are published on my GitHub profile.

QUIZTON: AI-POWERED QUIZ GENERATOR (THESIS)

- Developed a web-based platform for St. Jude College Dasmariñas that generates quizzes from lecture PDFs.
- Supports admin and teacher roles, question bank management, and exportable quizzes.
- Supports admin and teacher lecture management.

INSTAQUIZ: FILE INTO QUIZ WEB APPLICATION

- Developed a web app that automatically converts uploaded PDF lecture files into quizzes for students.
- Implemented quiz sharing, question extraction via NLP, and user-friendly UI for academic use.

SHAPESHIFT: GYM CHALLENGE APP

- Fitness application that calculate your BMI then recommend suitable program for the user.
- Created a fitness application with challenge modes and progress tracking.
- Integrated workout recommendations and goal tracking for enhanced user motivation.

MEMORY LANE: SMART PHOTO ORGANIZER

- Built a mobile app that saves, organizes, and categorizes user photos by event and emotion.
- Integrated features like timeline view and smart photo tagging.

NOTEFLASH AI: IMAGE TO FLASHCARD CONVERTER

- Engineered an app that extracts text from handwritten or printed notes using OCR then convert to deck.
- Converts content into flashcards with adaptive learning based on user performance.

MINI PROJECTS

SHARESKILLS: PEER LEARNING PLATFORM

- Designed a mobile platform where users can offer or request skills via scheduled sessions.
- Included chat, ratings, and in-app booking system for smooth coordination.

RESERVATION MOBILE APP

- Created a mobile app for managing bookings and reservations in real-time.
- Features calendar syncing, status tracking, and admin approval tools.

GO-TRADE: BUY AND SELL APP

- Developed a mobile app in C# for selling and buying secondhand goods.
- Included features like product listings, in-app messaging, and secure login system.

SOLVE 4: PUZZLE GAME

- Developed a Unity-based puzzle game requiring logical problem-solving skills.
- Implemented a scoring system, level progression, and polished UI.

EDELSTEIN LABYRINTH: 2D FANTASY MAZE GAME

- Built a 2D RPG-style Unity game with maze exploration and combat mechanics.
- Designed original sprites, levels, and narrative elements.
